INSERTS for WALL PLATES

Select inserts for RF connectors and/or for the RJ-45 Keystone jacks as needed. Note that the RJ-45 Keystone jack inserts are available in various colors for jack identification according to TIA/EIA standards. Stocking various, low cost colored inserts eliminates the need for stocking jacks in various colors. Use the blank insert if a space needs to be reserved for probable future expansion.

Snap-in ICONS for Keystone Jacks

An assortment of icons for added help in identifying each Keystone jack. This is a small, snap-in that fits each jack and depicts your choice of either a telephone, a PC Workstation or "CATEGORY 5". Icons provide a finished look and will help prevent user mis-identification, lost time and confusion. Assortment includes four each of Voice, PC and CAT 5.

Keystone Wall plates for Datacom

The Wall Plates listed in this section can be used with any jack which fits a standard keystone opening (.58" X .76"). You have the option to mix Audio, Video, Telephone and Computer devices in the same plate. There is NO need for a bezel (adaptor) with these wall plates, and they fit a standard single gang electrical mount.
